WDS • **Wren Data Systems**

CAPABILITY STATEMENT

We pull your data together and show you what you didn't know.

Government data consolidation, reconciliation and data migration validation for Washington agencies and prime contractors, led by a principal with 25+ years in data. Agencies and primes call us first for two things: consolidating data scattered across systems, and making sure a migration's data is right.

PRINCIPAL'S PRIOR RESULTS

2 million
children resolved to one record each, with every program attached, under signed MOUs

20+ state systems
including child welfare and income-based subsidy, integrated across 6 states into one cloud data system

6 states
shown which eligible children their programs were missing, using census and income data

$500K found day 1
in duplicate payments for one AP review

CORE SERVICES · WHERE MOST ENGAGEMENTS START

01 *"Our data is in too many systems."*

Data consolidation, analysis and enrichment

We specialize in consolidating data from many systems into one record per person, case or payment, then reconciling and analyzing it with a documented cause for every exception. Improper payment detection, payee and vendor matching, audit support, and funding-gap analysis.

02 *"Is this migration on track, and what does it mean for my program?"*

Owner's representative for system migrations

Independent oversight of the integrator's data work: readiness reviews, conversion testing, reconciliation at each mock conversion, and plain-language briefs on what changes for operations and reports. Go / no-go decisions on evidence.

HOW WE WORK

Trusted with sensitive data
Child, family, justice and health records handled under strict controls.

Patient with access
Plans assume data access takes time, so the work moves without it.

Vendor-neutral
No platform partnerships or resale.

Principal-led
The person who scopes the work does the work.

FEATURED OFFER · CORE SERVICES · 3 TO 4 WEEKS

Go-live readiness check

One Washington Phase 1A replaces AFRS with Workday for core financials, with a go-live range of October 2027 to October 2028. Agency systems that interface with state financials need to be ready before cutover.

Fixed price under $40,000 — within Direct Buy Level 1 for state executive branch agencies (DES POL-DES-125-03, eff. Sept 1, 2025). Up to $50,000 under Level 2 from a Washington small business. Discovery-only option under $10,000.

DELIVERABLES

- System and interface inventory
- Record-level reconciliation test plan
- Gap list with effort and owner
- Sequenced remediation plan

WHAT WE NEED FROM YOU

- Read access to the legacy system, or extracts
- A named interface owner
- A finance contact
- A project sponsor who can approve access

If access takes time, we start on the documentation.

NOT INCLUDED

- Fixing or converting the data
- Configuring Workday or the new system
- Ongoing oversight after the check (see 02)

WHERE ENGAGEMENTS GROW · MODERNIZATION, PROCESS, AI AND TRAINING WORK THAT OFTEN FOLLOWS

"Where should our data live long term?"

Data warehouse modernization and preparation

A permanent home for the data: inventory, vendor-neutral options, a target architecture, and migration-ready data; or smaller moves end to end with reports repointed.

"This tool isn't working for us."

Workflow assessments and playbooks

A map of how work and data actually flow, breakpoints and their costs, and a sequenced playbook with options and requirements.

"How should we be using AI?"

AI readiness and safe adoption

A playbook for AI inside the agency's own environment, such as Azure AI Foundry, and one small prototype on a real task, with the gain measured.

"Our staff need to use the new system."

Technical and data training

Curriculum, hands-on sessions, materials and train-the-trainer on SQL, Snowflake, Databricks and other cloud data platforms, reporting and practical AI use.
